HAMZA SHEHZAD

FULL STACK DEVELOPER

h4mzashehzad@gmail.com | +92 319 5299 636 | Portfolio | Linkedin | Islamabad, Pakistan

SUMMARY

Results-driven Full Stack Developer with 3+ years of hands-on experience architecting and shipping scalable web and mobile solutions. Adept at owning the full development lifecycle, from translating UI/UX designs into responsive front-end interfaces, to building robust back-end systems and database integrations. Currently contributing to two active production applications while pursuing a Software Engineering degree. Seeking a role where deep technical expertise and a product-focused mindset can drive meaningful impact.

PROFESSIONAL EXPERIENCE

Full-Stack Mobile Developer | RedLife | Part Time **Jan 2026 - Present**

- Architecting and developing a cross-platform React Native application for iOS and Android, with a focus on performance, reliability, and seamless user experience.
- Maintaining and extending a complex Laravel-based backend, ensuring scalable API communication across mobile and web interfaces.
- Driving full-stack feature development by closely aligning mobile-side functionality with backend logic, directly supporting product growth and evolving business requirements.

React Native App/Web Developer | Markaz.pk | Part Time **Feb 2025 - Present**

- Building and maintaining a data-rich, high-traffic React Native application with a strong emphasis on database connectivity, performance optimization, and user experience.
- Developing and shipping new features for the public-facing website, improving responsiveness and interface quality to support user growth objectives.
- Leading feature development within a complex admin dashboard, enabling content managers to efficiently add, edit, and manage platform listings.

Full Stack Developer | GRIPHENS Technologies | Internship **Oct 2023 - Apr 2024**

- Engineered responsive, production-ready websites using WordPress, Webflow, and React, working closely with design teams to faithfully implement UI/UX specifications.
- Handled complex back-end functionality and third-party API integrations, delivering complete end-to-end solutions for client projects.
- Improved site performance and resolved technical issues proactively, while maintaining clean, version-controlled codebases using Git.

PROJECTS

Blood Donors Community App **Jan 2026 - April 2026**

RedLife

A life-critical mobile platform connecting blood donors, recipients, and blood banks across Pakistan, built to make emergency blood access faster and more reliable.

- Front-end: Designed a clean, user-first interface with multiple dynamic screens optimized for accessibility and ease of use under high-stress scenarios.
- Back-end: Deeply integrated with a complex Laravel backend, ensuring real-time data flow and reliable communication between all user types.

Commercial Property/Agency Manager App **Aug 2025 - Sep 2025**

Markaz Agent

A comprehensive management application built for real estate agencies to centralize listings, track inquiries, and manage operations from a single platform.

- Front-end: Developed performance-focused dashboards and detailed management screens, giving agents full visibility and control over their portfolio.
- Back-end: Integrated directly with the production MySQL database, enabling real-time listing updates and seamless data synchronization with the main website.

Domain Marketplace Mobile App **Jun 2025 - Jul 2025**

PKDomains

A polished, minimal mobile marketplace purpose-built for buying and selling .pk domains, and the first of its kind in the Pakistani market.

- Front-end: Crafted a sleek, custom-designed UI optimized for all screen sizes, prioritizing clean navigation and fast browsing.
- Back-end: Connected to a MySQL database to dynamically serve domain listings and manage user account information in real time.

Photography Portfolio Website **Apr 2025 - May 2025**

Auraze Media

A visually immersive, fully responsive portfolio website built for a professional photography brand, using React 18 with Vite for optimal performance.

- Front-end: Implemented a masonry media layout with infinite scroll, delivering a gallery experience that showcases high-resolution content without sacrificing load speed.
- Back-end: Built a complete admin dashboard from scratch, giving the client full autonomy to add, edit, and manage all site content independently.

EDUCATION

Bachelor of Software Engineering **Feb 2023 - 2027 (Expected)**

SZABIST University, Islamabad Campus

- Coursework includes Software Design, Database Systems, and Web Application Development

ADDITIONAL INFORMATION

- **Languages:** English (advanced proficiency), and Urdu (native language).
- **Skills:** React.js, Next.js, Node.js, React Native, Vite, Tailwind, TypeScript, MySQL, Laravel, PHP
- **Certifications:**
  a. Certificate III in Information, Digital Media and Technology - AIE - 2021
  b. Full Stack Developer Certificate - Coursera - 2025
