SUMMARY

Results-driven Software Engineer with 3+ years of hands-on development experience in full stack development. Proven track record of delivering scalable solutions across front-end and back-end technologies. Actively seeking opportunities to leverage expertise in building responsive websites and cross-platform mobile applications.

PROFESSIONAL EXPERIENCE

React Native App/Web Developer | Markaz.pk | Full Time **Feb 2025 - Present**

- Working on a complex, data rich app focused on database connectivity and user experience.
- Contributing to website feature development and optimizing responsiveness to enhance user experience and support growth objectives.
- Implementing feature developments in a complex admin dashboard to add and manage content.

Full Stack Developer | GRIPHENS Technologies | Internship **Oct 2023 - Apr 2024**

- Engineered responsive websites in WordPress, Webflow, and React, collaborating with design teams to implement UI/UX designs.
- Performed complex tasks including back-end functionality, and third-party API integrations.
- Optimized performance and troubleshot technical issues while utilizing Git version control.

PROJECTS

Commercial Property/Agency Manager App **Aug 2025 - Sep 2025**

Markaz Agent

- A complete management app for agencies to add, update and organize listings and inquiries.
- Front-end: Detailed performance centric dashboards and screens to manage every aspect.
- Back-end: Linked with website MySQL database for real-time changes/updates.

Domain Marketplace Mobile App **Jun 2025 - Jul 2025**

PKDomains

- A React Native minimal and sleek domain marketplace app exclusively for .pk domains.
- Front-end: Custom designed clean and minimal UI screens optimized for all mobile devices.
- Back-end: Connected to MySQL database to dynamically fetch domain and user information.

Photography Portfolio Website **Apr 2025 - May 2025**

Auraze Media

- An interactive and responsive website built with React 18 as Vite app.
- Front-end: Implemented a masonry media layout with infinite scroll functionality.
- Back-end: Created a complete admin dashboard to add, edit and update all site content.

Cooking Recipe Catalogue Website **Mar 2025 - Apr 2025**

Cooking with Hajra

- A simple and minimal responsive website built as a Next.js app.
- Front-end: Categorical and user-friendly layout optimized for performance and ease of use.
- Back-end: Complete admin dashboard to add recipes with Prisma/MySQL integration.
